

# FUNDAMENTALS OF EXCELLENCE

-

Increase your performance by +50%

## **Individual and organisational performance at a much higher level**

Participate in this intensive and high-impact program and learn 10 critical competences of the future (identified by head-hunters and leading experts as the competences required to succeed in the future workplace\*).

The program offers a comprehensive tool-box that significantly improves individual, team and organisational performance. On average the participants expect to increase their value creation by **56% within the first year** of graduation and assess their full-scale **value creation potential** (by applying all the 10 new competencies) to be **a factor of 2.2-2.5x** (of their current value creation)\*\*.

### **Who participates?**

Leaders, knowledge workers and senior specialists interested in increasing their performance to the next level. The program provides you with a set of transferable skills, mind-set and behaviours that are relevant for virtually any professional in the future.

The 10 competences apply to you, whether you are a product-, process- or project owner, team or functional manager, talent or a new- or seasoned leader. The 10 competences are equally important to all knowledge workers, and universally applicable.

### **The program**

The program is a blended-learning experience, combining unique content delivered through a **digital learning universe** and learning sprints with **highly intensive workshops**.

The program includes 5 workshop days, one every two weeks over 10 weeks, with 5-6 hours digital learning, cases and exercises prior to each workshop.

### **Time, place and price**

Workshops are held on location in DTU Science Park in Lyngby. The program runs every quarter with kick-off in January, April, August & October.

The program price is DKK 28.400 plus VAT, which covers the entire program, digital modules and workshops, materials, food and drinks. Travel/flights are not included.
